projects

- **Disaster relief hackathon winner**
www.heroanywhere.com During a rapid 3-day challenge hosted by the Department of Defense in February 2017, I formed a team, went through IBM's design thinking process to form a unique valuable solution to a specific problem scenario, and created a webpage to share the idea. Join the movement today.
- **Systematically analyze and visualize tweets and live twitch chats**
data-visualization.herokuapp.com I lead a 6 person team through the agile development process to design and develop a site that utilized the twitch and twitter APIs to create visualizations of recent and popular terms. I managed the team as well as developed the twitter functionality
