Web Development Projects

- **MD5 Department of Defense Hackathon Winner (www.heroanywhere.com)** on February 24, 2017 in less than 48 hours we developed a winning idea and website. Hero Anywhere is a framework to connect incident commanders with skilled mobile volunteers during times of disaster. Join the movement.
- **All My Online Info (allmyonline.info)** is a project that centralizes a user's information from multiple accounts across the internet into one place. Incorporates Facebook API to retrieve and process user data. Built with Amazon Web Services, Linux, Apache, Git, PHP, MySQL, and jQuery, HTML, and CSS.
